Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Ms. Brenda Holmes on March 7, 2005.

In the Claims:

Claims 4 – 7 stand as set forth in the amendment of January 4, 2005.

Claim 3 now reads as follows:

3. (currently amended) A mirror drive unit, comprising:
- a power unit disposed in a mirror housing;
 - a mirror holder tiltably supported by the power unit through a joint; and
 - an angle detection unit disposed in the power unit, the angle detection unit detecting a tilt angle of the mirror holder,
- wherein the angle detection unit is provided with a temporary fixing mechanism for temporarily fixing the angle detection unit to the power unit,
- wherein the power unit includes an engagement portion projected from the power unit,

~~wherein the temporary fixing mechanism includes a pair of arms, which is projected from a body of the angle detection unit and fitted to the engagement portion of the power unit in a manner of holding the engagement portion, and~~

wherein the engagement portion comprises a cylinder portion, which is projected from the power unit and includes an inner peripheral surface slidingly guiding tilting of the mirror holder, and

wherein the temporary fixing mechanism includes a pair of arms, which is projected from a body of the angle detection unit and fitted to the engagement portion of the power unit in a manner of holding the cylinder portion.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art, taken alone or in combination, fails to teach or fairly suggest a mirror drive unit comprising, *in combination*,

a cylinder portion projected from the power unit and including an inner peripheral surface slidingly guiding tilting of the mirror holder, particularly wherein the temporary fixing mechanism includes a pair of arms, which is projected from a body of the angle detection unit and fitted to the engagement portion of the power unit *in a manner of holding the cylinder portion*, as now recited in claim 3.

The examiner concurs with Applicant's remarks concerning the subject matter of claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
